#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 1/13/06 LRP
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claim 1 is rejected under 35 U.S.C. § 102(b) as being anticipated by Dougherty et al (4,973,796).

Dougherty et al disclose:

Regarding claim 1, a rail profile 24 (see figs 1 and 3-4) and presentation device produced therewith, the rail profile:

- a) being intended to be fastened to a supporting structure 20 (see fig 1);
- b) having arranged within it a conductor rail 70 which is supplied via a power supply 160 and has conductors 162 partially embedded in an insulation profile (see figs 1 and 3, and entire column 7);
- c) having a passage 42 which extends from the front entry into the profile rail (see figs 3-4), runs continuously at least substantially along the rail profile, ends at a back strut 34 and permits the engagement of an adaptor 210 for the conductor rail to the conductors in a freely selectable position in order to supply a consumer which can be

connected via a supply line (see figs 3-4 and column 8 lines 25-35), characterized in that

d) the rail profile is provided for vertical installation in the supporting structure (see figs 1-4), and

e) when installed, in principle only the passage which emerges through a groove 78 in the supporting structure is visible from the front side of the supporting structure (see fig 4, lines 40-55).

### **Claim Rejections - 35 USC § 103**

The following is a quotation of 35 U.S.C. 103 (a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 9 is rejected under 35 U.S.C. § 103 (a) as being unpatentable over Dougherty et al (4,973,796).

Dougherty et al disclose:

Regarding claim 9, Dougherty disclose all the features of the claimed invention as shown above, but fails to disclose said rail profile being made from an aluminum extruded profile and said insulation profile of the conductor rail being produced from a

plastic extruded profile. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the assembly of Dougherty et al with It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the assembly of Dougherty et al with, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

***Allowable Subject Matter***

3. Claims 2-8 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
